

User Guide for Wi-Fi Printing Service (Windows)

Follow the steps to install the printer driver on your computer and configure default printer settings.

Install printer driver

1. Download the printer driver from Library webpage and save it on your computer. Right click the file and select "Run as administrator".

2. The below screen will be displayed. Change the Destination folder if necessary. Click "Install".

💾 WinRAR self-ex	tracting archive —	×
	Press Install button to start extraction. Use Browse button to select the destination folder from the folders tree. It can be also entered manually. If the destination folder does not exist, it will be created automatically before extraction.	
	Install Cancel	

3. On next screen, click "Start Install".
